## About FastPassCorp

FastPassCorp develops and provides password management solution, Password Manager which has become the industry standard for secure, self-service password reset and synchronization.

FastPassCorp was established in 2005 originally as a subsidiary of IT InterGroup A/S. Today FastPassCorp is the software division of IT InterGroup A/S noted on the OMX Nordic Stock Exchange (ITIGRP).

IT InterGroup also consists of the consulting division Service & Solutions which is working in the market for electronic security management and has its core competencies within Identity and Access Management. Service & Solutions has implemented a considerable number of larger Identity and Access Management projects in Denmark and internationally.

FastPassCorp relies strongly on local partnerships with accredited Service Providers, Value Added Resellers and Distributors serving customers to provide solutions that enable fast ROI. FastPassCorp is committed to developing password solutions that make the daily life of our customers easier and more secure.

### Self-Service Tools

The FastPass value propositions are based on a suite of self-service tools including:

- FastPass Password Manager
- FastPass Mobile Password Manager
- FastPass Password Account Self-Claim
- FastPass Password Filter
- FastPass Windows Client
- FastPass Synchronization
- FastPass SOA Connectors

### Differentiators

Built to use Active Directory, ADAM or SQL as the authoritative repository these tools are capable of delivering an instant ROI by deploying in just a few hours in your existing Microsoft environment. Further value can be gained by integrating these tools with Microsoft Identity Integration Server (MIIS and ILM2007) for an industry leading Identity and Access solution.

FastPass is based on a state-of-the-art "Service Oriented Architecture (SOA) in line with requirements from large IT-organizations enabling swift continuous development of the FastPass product suite and extremely fast and inexpensive implementation.

### FastPass Solution Editions

FastPass solutions are available in the following editions:

- Enterprise Edition
- SMB Edition
- Service Provider Edition

Within each Edition customers can choose to buy the self-service tools separately or delivered in a pre-configured a bundle.

### References

The FastPass solution is today used by thousands of users through-out the US and Europe. I the left logos from some of the organizations that have entrusted FastPass to provide their password management solution can be seen.
